Helpful General Info

No-Chew Bandages

Here's a trick to prevent your horse from chewing on applied leg wraps. Put some ordinary laundry detergent in a jar or container and add a small amount of water until a soapy paste forms. Wrap the horse's leg with a wrap as needed. Then, apply the soapy paste to the outside of the wrap covering the entire area. Horses don't care for the taste of soap and will usually leave the wrap alone. An added bonus comes at laundry time – the wraps will have their own built-in soap supply.
